

B100F

DIAMETER

99mm

LENGTH

296mm

WEIGHT TURBINE

1210g

WEIGHT PERIPHERY

360g

MAX THRUST

120N @ 125,000 rpm

MIN THRUST

5N @ 39,000 rpm

CONSUMPTION

385ml, 316g @ 120N

EXHAUST TEMPERATURE

670-740°C

FUEL

Kerosene, Diesel, Petroleum

ACCELERATION 38K-125K RPM

2.8s

PRESSURE RATIO

3:1

Innovation

- Low fuel consumption
- Rapid acceleration
- ECU with Auto-Off and turbine identification
- Turbine with fully integrated thermo couple, fuel ignition and starter
- CNC milled compressor
- Supplied with all necessary accessories for installation and operation
- Suitable for two-stroke oil
- Maintenance interval 50 hours
- All parts made in Germany
- 24-month warranty
